

# DR ANDREW MONCHAR

## MRCVS – VET PROFILE

### Title

Dr Andrew Monchar MRCVS

### Job

Clinical Director

MRCVS stands for member of the Royal College of Veterinary Surgeons. It shows that this doctor is a vet who treats animal patients, not humans.

**I became a vet by** studying for 6 years in London and Liverpool.

### My favourite part of being a vet is

the wide variety of animals I'm able to treat, from dogs, cats, and rabbits to lizards, parrots, hedgehogs, wildlife, and zoo animals.

### To become a great vet, you need to

- work hard
- enjoy team work
- be good at speaking with people
- be on time for appointments
- have good hand-to-eye coordination for surgery

### My least favourite part of being a vet is

when there's no treatment to make a pet better, and I have to tell the owner.

### I have worked with

- zoo animals
- pets
- exotic pets
- wild animals
